MS PROJECT

The MS Project Plugin contains the popular Microsoft Project planning program. This program can be used to coordinate and plan larger jobs that involve multiple stages for completion and / or coordination with other contractors or timetables.

What's unique about containing Project in a Plugin is that the Plugin automatically loads the current project for your customer when your customer's account is selected. When you switch from client to client, you will automatically see the current project for each client you switch to.

More about MS Project

Microsoft Office Project gives you robust project management tools with the right blend of usability, power, and flexibility, so you can manage projects more efficiently and effectively. You can stay informed and control project work, schedules, and finances, keep project teams aligned, and be more productive through integration with familiar Microsoft Office system programs, powerful reporting, guided planning, and flexible tools.

Add the MS Project Plugin for only \$295.00 MS Project sold separately.

MS PROJECT PLUGIN

- Seamlessly integrates Project into your program
- Easily plan time and material for projects
- Understand and control project schedules and finances
- Effectively communicate and present project information
