# MS WORD PLUGIN

MS WORD

The MS Word Plugin contains the popular Microsoft Word processing program. This program can be used to create professional documents for your clients..

What's unique about containing Word in a Plugin is that the Plugin automatically loads the most recently edited document for your customer when your customer's account is selected. When you switch from client to client, you will automatically see the most recently edited document for each client you switch to.

More about MS Word
Office Word 2007 helps information workers create professional-looking content more quickly than ever before. With a host of new tools, you can quickly construct documents from predefined parts and styles, as well as compose and publish blogs directly from within Word. Advanced integration with

Microsoft Office SharePoint Server 2007 and new XML-based file formats make Office Word 2007 the ideal choice for building integrated document management solutions.

Add the MS WordPlugin for only $295.00 MS Word sold separately.
