MS EXCEL
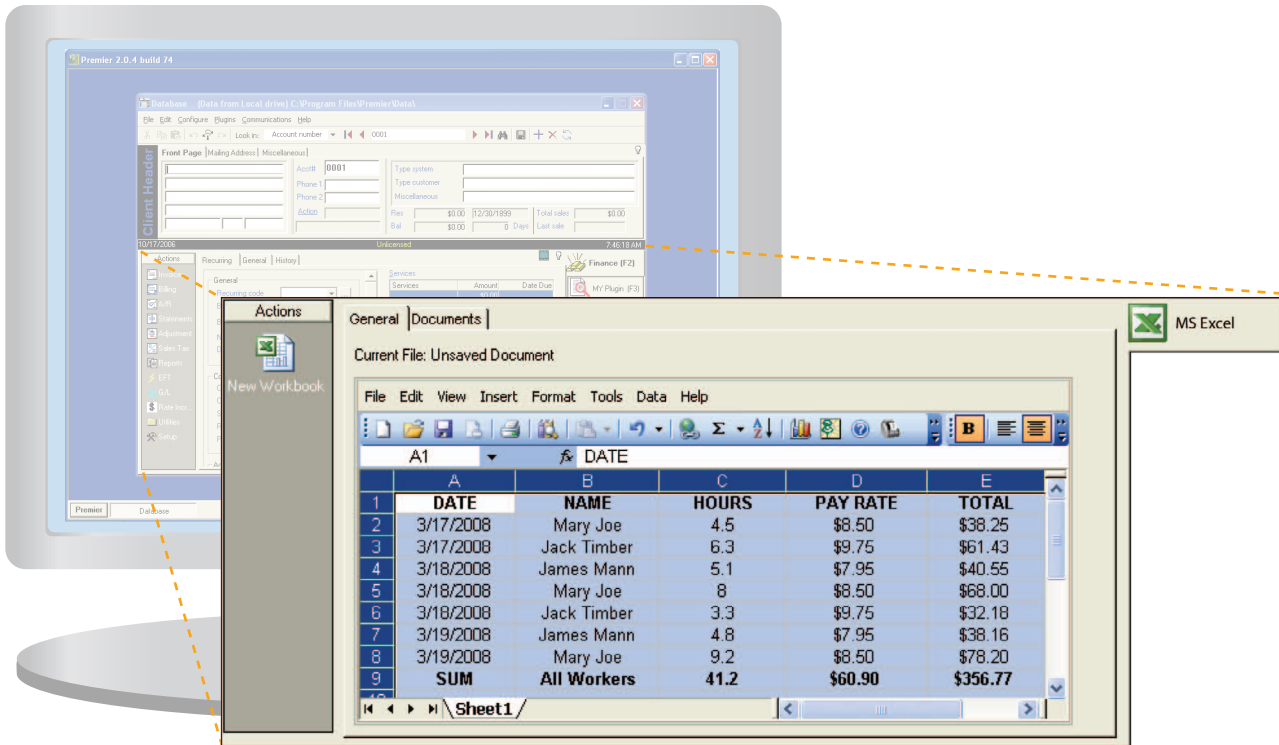

The MS Excel Plugin contains the popular Microsoft Excel spreadsheet in your program. This program can be used to create your own spreadsheets for your clients. Even with a wide range of optional Plugins, you may wish to hold some client information or client financial data in a spreadsheet.

What's unique about containing Excel in a Plugin is that the Plugin automatically loads the most recently edited spreadsheet for your customers when your customer's account is selected. When you switch from client to client, you will automatically see the most recently edited document for each client you switch to.

Move about MS Excel
Microsoft Office Excel is a powerful tool you can use to create and format spreadsheets, and analyze and share information to

make more informed decisions. With the Microsoft Office Fluent user interface, rich data visualization, and PivotTable views, professional-looking charts are easier to create and use.

Add the MS Excel Plugin for only $295.00 MS Excel sold separately.

MS EXCEL PLUGIN
